

**OBERON CLASS
EXPLORATION STARSHIP**

**CENTERLINE
CROSS SECTION**

Oberon Class Starship (TL13)

Hull Size: 500 tons
 Main Computer: Model/5
 Flight Avionics Computer: Model/5
 Sensors Computer: Model/5
 Communication Computer: Model/5
 Maneuver Drive: 5-G
 Jump Drive: Jump-3
 Power Plant: Fusion (59EP)

T20 stats

Agility: 5
 Armor Rating: 4
 Fuel: 209 tons
 Streamlined
 Weapons
 Pop-up triple turrets x2
 1: 3 Beam lasers
 2: 3 Fusion guns

Other information

Fuel Scoop
 Fuel purification plant
 Staterooms: 6
 Laboratory
 Sickbay w/auto-doc
 Engineering shop
 Emergency low berth (4)
 Cargo: 24 tons

Crew

Pilot/Driver
 Engineer/Comm.
 Astrogator
 Physician/Sensor
 (Gunner)
 (Academic)

General description:

The Oberon class starship is a top of the line exploration starship designed to enable deep exploration by a crew of 4 to 6. Its jump-3 capability lets the ship make jumps to most stars and the fuel scoop and fuel purification plant give it increased autonomy. It has very long range sensors to help in surveys and a powerful computer system to support its data collection and analysis. To be able to evade the possible dangers of the frontier in which it is designed to navigate, it has 2 hidden pop-up turret with both defensive beam lasers and offensive fusion guns, as well as great agility and armor. To be able to explore planets it is equipped with an ATV vehicle. In case of damage or accident, it is equipped with a complete engineering shop, as well as a complete sickbay with auto-doc and emergency low berths.
